Summary
DSA (Data Structures and Algorithms) is a fundamental concept in computer science that deals with the organization, management, and manipulation of data. It has numerous real-world applications in various fields.

Key Points
* DSA is used to solve complex problems efficiently
* It involves the use of data structures such as arrays, linked lists, stacks, and queues
* Algorithms are used to manipulate and analyze the data stored in these structures
* Real-world applications of DSA include database management, file systems, and web search engines

Steps/Reasoning
To understand the real-world application of DSA, consider the following steps:
* Identify a problem that requires efficient data management
* Choose a suitable data structure to store and organize the data

Problem Statement

Given meeting intervals, determine if a single meeting room can host all meetings without overlap.

CUSTOM INPUT (STDIN)

Provide runtime input as JSON. Example: [[2,7,11,15],9]

Examples

[[0,30],[35,50]] → true

[[0,30],[15,20]] → false

Constraints

- 1 <= intervals.length <= 10^5
- 0 <= start < end <= 10^9

Code Editor

JAVASCRIPT PYTHON JAVA CPP

```javascript
function canAttendMeetings(intervals) {
  intervals.sort((a, b) => a[0] - b[0]);

  for (let i = 1; i < intervals.length; i++) {
    if (intervals[i][0] < intervals[i - 1][1]) {
      return false;
    }
  }
  return true;
}
```

Q1. What is the time complexity of the Binary Search algorithm?

- O(n log n)
- O(n^2)
- O(n)
- O(log n)

Hide Answer

Answer: O(log n)

The Binary Search algorithm has a time complexity of O(log n) because it divides the search space in half with each iteration.

Q2. What does DSA stand for in the context of algorithms and data structures?

- Dynamic Systems Analysis
- Data Structure Algorithm
- Digital Signature Algorithm
- Digital Signal Analysis

Q1. What is the primary function of the 'swap space' in an operating system?

- To provide additional memory by using disk space
- To provide a buffer for input/output operations
- To store temporary files
- To allow multiple users to share the same computer

Show Answer

Q2. Which of the following operating systems is an example of a real-time operating system?

- macOS
- VxWorks
- Linux
- Windows 10
